

Advanced  
technology cleaning

# Did you know that 60% of workplace illness is contracted from contaminated office equipment?

## WORKSTATIONS

A typical desk has 10 million bacteria.

## NOROVIRUS

Can live for up to 350 hours!

## HEADPHONES

Headphone bacteria can multiply x 700 after just one use.

## PRINTERS

A communal office printer is touched up to 300 times a day.

## SMARTPHONES

10 x dirtier than a toilet seat!

## LAPTOPS

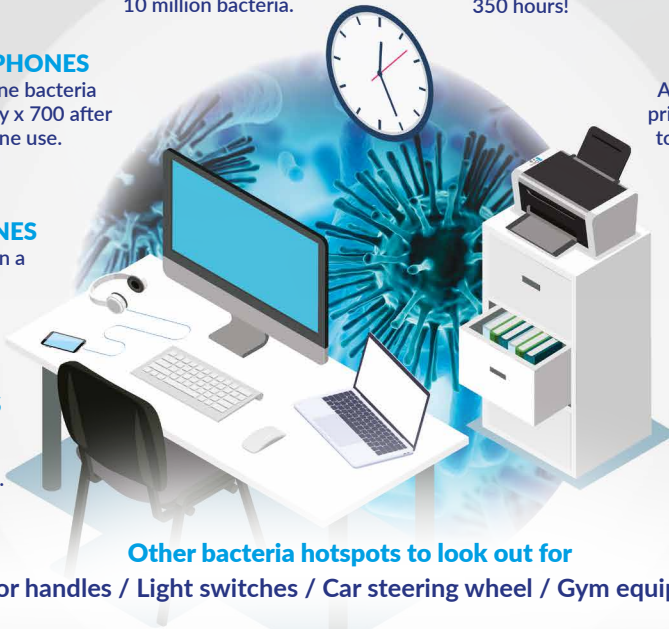

Dust is mainly made up of dead skin cells gathering on your screen.

## KEYBOARDS

Crumbs are a serial bacteria breeding ground.

## MOUSE

A PC mouse is the 3rd most virus ridden piece of equipment in the office.

### Other bacteria hotspots to look out for

Door handles / Light switches / Car steering wheel / Gym equipment
